GUIDE

Indice Commercial

Canadien

2ème PARTIE

Commencant à la page 279, sur papier vert, se trouvent les noms et les adresses des manufacturiers.

3ème PARTIE

Commencant à la page 479, se trouve une liste alphabétique des articles fabriqués au Canada, donnant les noms de toutes les maisons qui les fabriquent.

Le mot principal en Anglais est ordinairement placé le premier, suivi d'une phrase le modifiant, i.e., Quincaillerie, de construction: Cuir, coupe de bottines et chaussures. Mais, quand l'inversion ne semble pas faisable le mot modifiant est placé le premier, et est ainsi arrangé dans la liste alphabétique, i.e., Mécanisme de piano—Piano hammers; Shoe packs—Chaussures en cuir tanné à l'huile. En cas de doute on peut essayer les deux méthodes. Quand deux noms ou plus sont communément employés pour le même article, nous avons essayé de donner des explications vis-à-vis. Quand on désire l'adresse de la rue, voir la IIème Partie, commençant à la page 279. Les noms des fabricants qui font ou sont intéressés dans le commerce d'exportation sont indiqués par un asterisque★.

4ème PARTIE

Commencant à la page 919 Section Spécial indiquant les noms des exportateurs principaux des produits de la ferme, etc. La traduction française se trouve au revers.

5ème PARTIE

Commencant à la page F-1 sur papier vert. Section de Traduction—(a) Français, page F-1. (b) Espagnol (édition limitée), page S-1. (c) Portugais (édition limitée), page P-1. Les noms des articles donnés dans l'Indice Français et Espagnol et Portugais sont suivis par leur équivalent en anglais, et l'équivalent en anglais se trouve placé alphabétiquement dans la IIIème Partie.

More than one of the Wood hoists shown will lift your loads . . . but only one type is best suited mechanically for your truck and type of work.

No one type of hoist can do every job efficiently any more than any one type of truck can. That is why Wood builds **five** types of hoists—to provide exactly the right mechanical features and mounting for each job. The chassis, body overhang, differential and brake diaphragm clearance, dumping conditions and other factors all must be considered in addition to capacity in selecting a hoist for longest, most profitable service and minimum maintenance.

Only Wood offers an adequate selection because only Wood builds five different types of hoists. Your local Wood distributor—along with our engineering department—is equipped to select the proper hoist for every job.

**No matter how many
drums you ship**

*There will be **NO** leakage
NO seepage—**NO** tampering
if they are equipped with*

CLOSURES

LARGE shipments of drums, equipped with Tri-Sure Closures*, have been left in open storage for months—without the slightest evidence of leakage, seepage or contamination.

The reason is that the Tri-Sure flange, plug and seal give *complete protection* under *all conceivable conditions*.

The flange is part of the drumhead—as strong as the drum itself—and its octagonal shape prevents turning. Into this flange, the plug is screwed securely to effect a tight closing. And, crimped over the flange and collar of the drum stock, the heavy-gauge seal tightly compresses its cork gasket, and forms a covering which is leak-proof, air-tight and absolutely impervious to pilferage, tampering and substitution.

Make your drums *safe* for your product—no matter how far they travel or how long they are stored—by specifying “Tri-Sure Closures” whenever you order drums.

* The “Tri-Sure” Trademark is a mark of reliability backed by 26 years serving industry. It tells your customers that genuine Tri-Sure flanges (inserted with genuine Tri-Sure dies), plugs and seals have been used.

AIR FURNACE MALLEABLE IRON CASTINGS BLACK OR GALVANIZED

CANADA'S LARGEST VISE MANUFACTURERS

RAE VISES are manufactured in a complete range of 26 sizes to meet all requirements of Canadian Industry.

The outstanding feature of all RAE VISES is

RAE BENCH VISE

Stationary or Swivel Base
Size range 3" to 6" jaws width
Renewable Jaw Plates

The **MALLEABLE IRON NUT**. This is the part in ANY VISE that is subjected to the most wear. Security and Rigidity are essential with a detachable nut, so the RAE NUT is dovetailed into the base of the BACK JAW and is absolutely fixed and rigid in the vise. The Nut is held in place with a steel pin, which is easily removed whenever a replacement is required.

The above feature means that a **complete back jaw DOES NOT HAVE TO BE REPLACED**, whenever the continual operation of the screw has worn the threads of the nut. This nut can be replaced at a cost of only a few cents.

ALL OUR VISES ARE EQUIPPED WITH THE ABOVE FEATURE.

INDIVIDUALLY CARTONED

More than a Century of Textile Experience

The name Courtauld has been identified with textile production since 1798; succeeding years have brought an accumulation of practical experience and scientific knowledge unexcelled in the textile industry.

Courtaulds (Canada) Limited has ready access to this store of technical information. This—along with its own extensive research and laboratory facilities—enables the company to work closely with spinners, weavers and knitters, helping them to iron out production problems . . . bringing them the benefit of "know-how" obtained in more than a century's pioneering in the field of textiles. This pioneering, in fact, has been largely responsible for the present world-wide utilization of rayon—and Courtaulds' constant search for new and improved uses for rayon continues with undiminished vigour today.

Close co-operation with all branches of the textile industry has always been Courtaulds' foremost aim. An opportunity to work with mills to build up new lines and new sales with rayon is always welcomed.
